

# Flood Damage?

If you had water or flood damage from the storms that began November 5 . . . **REPORT IT!**

**WHY?** If we can show that Clark County sustained substantial damage, our community *may* be eligible for low cost loans or federal grants to cover uninsured losses to public and private property. We all benefit from these funds. They can be used to repair public roads, fix private residences, and help businesses recover economically.

**WHO?** Anyone that has had damage to their property in Clark County, like a home, business, or personal belongings, should report it.

**WHEN?** The deadline for initial reporting is **November 17th**. *IF* Clark County is qualified for the federal assistance programs, it may be weeks more before we know. If you make repairs in the mean time, document everything, include pictures if you can, and save all estimates and receipts.

**WHAT HAPPENS NEXT?** Clark Regional Emergency Services Agency (CRESA) compiles all the information and sends it on to the State. The State makes an appeal on our behalf to the Federal Emergency Management Agency (FEMA). Providing your information does *not* automatically register you for help from FEMA. Homeowners and businesses will be invited to apply directly for benefits if they are approved.

**HOW?** CRESA has set up a damage reporting phone line. After you report your damage, tell your friends so they can report also. You may also send your name and phone number by e-mail to [cresa@clark.wa.gov](mailto:cresa@clark.wa.gov) so we can call you back to collect your information. Visit the CRESA web site at <http://www.cresa911.org> to download this flyer and share with others .

**Call: (360) 992-9229**
